<b>Project</b>	NCNR Instrument Project		<b>Revision</b> <input type="checkbox"/>		
<b>Originator</b>	Peter Hundertmark		<b>If revision, provide the following:</b>		
<b>Date</b>	January 6, 2004		<b>Previous Submittal</b>	038-xxxx	
<b>Database Reference</b>	WorkManager reference		<b>ECR/ECN</b>	038-xxxx	
<b>Scope</b>					
Submittal of CFX assembly from Transfer Engineering					
<b>Purpose</b>					
Submit the CFX assembly for a reference model to use for shield design.					
<b>Description</b>					
See model manager and search for part number 038-2488 or "macs_cfx_assy"					
<b>Filing</b>		<b>Change Process</b>			
When filed as a submittal, this form and the information attached to it transforms into a released document when it is signed by all parties named in it. The form with attachments is kept on file in the office of the NIST chief engineer. When attachments are electronic in nature (such as electronic CAD data) that information and its hierarchical position in the project design tree shall be identified in or under this submittal. Information Requests, Submittals and Releases are numbered separately, yet sequentially.		Anyone can propose a change to documentation that is released under this form. To such end an Engineering Change Request (ECR) is filed. A priori, the change board is composed of the individuals that signed the submittal against which the ECR is drawn. Approval of the ECR turns it into an Engineering Change Notice (ECN), which gives authority to prepare a new submittal. The new submittal covers at least the fully executed ECN. Approval of the new submittal signifies close-out (full implementation) of the ECN.			
<b>Endorsements (list composition is part of release and determines Change Board for ECR/N's)</b>
